02.03

RENEGADE X: PATCH 5.372 RELEASE

BY YOSH56

Patch 5.372 provides several fixes for issues created in the last release. Most notably, the 'return to battlefield' bug when exiting the passenger's seat of a vehicle should be fixed. A number of map exploits have also been removed.

The LONG dormant map Daybreak, has also finally made its way to the battlefield, and while we were busy casting resurrection, we've also brought back the Repair Pad. Of course, it has been given a substantial makeover.

FULL CHANGELOG

Bug Fixes

- Exiting vehicle passenger seats should no longer be a death sentence.
- Damage should cause both the shake and hit effects to play again

Visuals & Audio

- Names of characters and vehicles are now completely spelled in Q-Spotting

Maps

Canyon/ Eyes/ Field/ Field-X/ Lakeside/ Under

- Added several blocking volumes to prevent climbing in off limits areas
